- Committee reports:
 - Lake management**-committee Chair, Bob Biancalana introduces the opportunity to purchase and maintain the public boat launch. After discussion, the board asked him to do research and bring back on April and August agendas. Kyle Cassel reported great success with weed treatment. We density was classified as "scattered dense" in most areas. The treatment map and summary will be posted on the website.
- -**Clean boats/clean water**-plan and online transition has not been effective. We are down by hours and number of volunteers. 13 people volunteered and gave 35 hours (vs 135 hours in 2023). We need volunteers in 2025!
